

Senior Care Group, Inc.
"Lighting the Way"

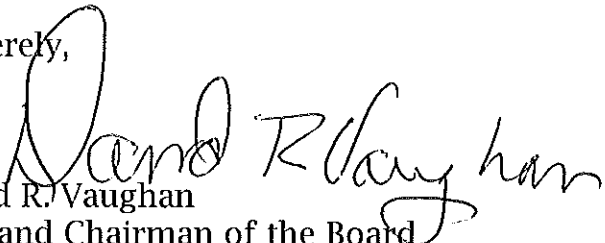

September 7, 2011

Greetings:

An EarthLinked Commercial Water Heating system was installed in the assisted living facility at the Sun Towers Retirement Community in Sun City Center, Florida. It was extensively tested by the U.S. EPA. Based upon our customer satisfaction and the verified energy savings, I am happy to serve as a reference on behalf of EarthLinked Technologies. The EarthLinked system delivered a significant operating cost reduction, short-term ROI and a positive environmental impact.

We are currently seeking financing for the installation of additional EarthLinked water heating systems.

Sincerely,

David R. Vaughan
CEO and Chairman of the Board
